BRIEF OF THE PROJECT:

- Main Introduction Page.
- Sign-up Page, Login Page, About Us Page.
- After the user is done with the signing up procedure, the user is re-directed to the login page, after logging in, they will be able to see the list of actions provided to further proceed like giving the opponent players name, choosing to set up a profile, history of games played, settings for the game, etc.
- As the user further progresses to play the game with the opponent, if the player/opponent, any chess piece reaches the end of the opposite another half, the result is declared and that person wins the game, hence leaderboard will be updated accordingly.
- The user can switch between light and dark theme modes as per their requirements.
- The chessboard will be assigned with numbers and alphabets to store the moves of the chess pieces.
